Education

Rutgers University

Graduation May 2025

B.S. in Electrical and Computer Engineering | Summa Cum Laude

New Brunswick, NJ

- **Relevant Coursework:** Data Structures & Algorithms, Computer Architecture, Machine Learning, Intro to Deep Learning, Embedded Systems, Software Engineering, Principles of Electrical Engineering

Experience

AI Engineer (Intern)

Dec 2025 – Mar 2026

EliteIS

Remote

- Designed and implemented an AI recruiter system in n8n, automating key recruiting workflows including job requirements intake, candidate/client coordination, and conversational interview scheduling across 9 AI agents and 16 workflows
- Migrated initial email ingestion from 1-minute polling to a webhook-based architecture using Google Cloud Pub/Sub and Microsoft Graph subscriptions, reducing average inbound email detection latency by 30x.
- Integrated Google Calendar and Microsoft Graph APIs to automate calendar availability checks, slot selection, and meeting creation across Google Meet and Microsoft Teams

Software Engineer (AI) - Contract

April 2025 – June 2025

Confiz

Remote

- Designed and deployed an end-to-end system to process multi-phase customer journey data, generating monthly cohort metrics and visualizations for 5 brands across 20,000 customers
- Integrated LLMs for automated generation of tooltips and prompt cards from aggregated metrics, mapping outputs to Azure SQL for scalable delivery of customer insights
- Developed an AI-powered Copilot service with FastAPI and Azure AI Foundry, streamlining access to product performance insights and enabling leadership to directly assess product effectiveness

Software Engineer (AI & Backend Intern)

Sep 2024 – Dec 2024

Mynd

Remote

- Engineered a Python data pipeline to scrape 21,000+ therapist profiles, automating contact discovery and competitor analysis, resulting in a 469% increase in qualified sales leads for the company's mental health platform
- Leveraged AI to automate the creation of intake forms for therapists, streamlining the onboarding process for new clients
- Designed and developed backend endpoints in Django to support AI-driven features, integrating with a tech stack consisting of React, Chakra, and TypeScript on the front end

Projects

Resolved | NextJS, Flask, Pinecone, Langchain, PostgreSQL, Docker

- Engineered a multimodal customer complaint analysis platform for a fintech startup; integrated AssemblyAI, Google Cloud APIs, and OpenAI, resulting in efficient processing times for customer inquiries
- Designed a RAG Pipeline to smart search over 4,400 Company Complaints, providing accurate and actionable insights to team members for addressing specific issues

Intelligent LinkedIn Growth Facilitator | TypeScript, Python, AWS RDS, OpenAI, Docker, Kubernetes

- Developed an AI-powered full-stack application using Next.js and Flask to automate video transcription and LinkedIn post generation, aiming to reduce manual effort and enable rapid content creation
- Prompt engineered an LLM to replicate top performing LinkedIn posts to maximize user interaction and accelerate account growth

Technical Skills

Languages: Python, TypeScript, JavaScript, C, VHDL

Technologies: Next.js, Node.js / Express, Django, Flask, FastAPI, MongoDB, Firebase, Pinecone, Linux, SQL, Databricks, Pandas, Scikit-learn, Tailwind CSS, Jasmine

Tools / Platforms: n8n, Cursor, Docker, Git, Kubernetes, Postman, ngrok, Google Cloud Platform (GCP), AWS, Amazon RDS, Azure, Azure AI Foundry, OpenAI, Claude, LangChain, Clerk, Auth0
